-brazilian-football-zoom-football-fifa-football-latin-american-football-rounament-2018-world-cup-2018-finals-finale-fifa-world-cup-2018-2018-07-20. znx0-games-3459190-tpb-41-kaswell-brazilian-football-zoom-football-fifa-football-latin-american-football-rounament-2018-world-cup-2018-2018-07-20. I think you can use the :keyword option of the @include directive in the loop: @include 'users/getUserAvatar.html'; @for \$i from 1 to 3 { @include 'users/getUserAvatar.html'; It's not clear to me what you're trying to achieve with the loop. You could also wrap the code in a map: map: getUserAvatar: 'users/getUserAvatar.html'; @include getUserAvatar; or @include map.getUserAvatar; If you need to repeat the same code more than 3 times you can use a template: @if (count(\$users) > 3) { More than 3 users } else { @for \$i from 1 to 3 { User #{ \$i } users/getUserAvatar.html 82157476af
